

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

Introducing FEEL GREEN & Successful Kick-Off Meeting

The FEEL GREEN project – Fostering Energy Efficiency Leaders:

Empowering Youth to Start a Green Revolution – has officially started its journey towards promoting sustainability, green skills, and energy efficiency among young people across Europe. Funded under the Erasmus+ Programme, FEEL GREEN aims to empower youth workers and youth with the knowledge, competences, and innovative educational tools needed to support a greener and more sustainable future.

In a time where climate change, energy consumption, and environmental challenges continue to affect communities worldwide, FEEL GREEN was created to address the urgent need for awareness and education around sustainable energy practices. Through non-formal education approaches and international cooperation, the project seeks to encourage more responsible environmental behavior and strengthen youth participation in climate action initiatives.

The project brings together organizations from **Greece, Slovakia, and Luxembourg**, combining expertise in sustainability, youth work, education, and innovation. Throughout the implementation of the project, the partners will collaborate in the development of educational resources, digital tools, research activities, and awareness campaigns focused on energy efficiency and green transition.

Among the main objectives of FEEL GREEN are the development of green and digital skills for youth workers, the promotion of sustainable lifestyles, the creation of innovative educational methodologies, and the enhancement of youth engagement in environmental issues. The project will also develop a research-based methodology, educational materials, a handbook of good practices, and an interactive e-platform designed to support learning and awareness raising at the European level.

As part of the first steps of the project, in 02/12/2024 we successfully held the official **FEEL GREEN Kick-Off Meeting virtually**, bringing together representatives from all partner organizations. During the meeting, we exchanged ideas and perspectives regarding the project's vision, objectives, and expected results, while also discussing the responsibilities of each partner and setting the foundation for the implementation of the upcoming activities. Special attention was also given to communication methods, dissemination planning, quality management, and the coordination of future project actions.

The Kick-Off Meeting marked an important milestone for the FEEL GREEN partnership, strengthening our cooperation and establishing a common understanding of the project's direction and priorities. Through constructive discussions and collaborative planning, we successfully defined the next steps of the project and reinforced our shared commitment to promoting sustainability, energy efficiency, and green awareness among young people across Europe.
