

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

Official Launch of the FEEL GREEN E-Platform

The FEEL GREEN partnership is excited to officially announce the launch of the FEEL GREEN E-Platform, an innovative digital learning environment developed to promote sustainability awareness, energy efficiency, climate education, and green skills among young people and youth workers across Europe. The platform represents one of the most important outcomes of the project, combining educational content, interactive learning methodologies, digital accessibility, and visually engaging educational experiences within a modern online environment specifically designed for non-formal education and youth participation.

Before the official launch of the platform, the FEEL GREEN consortium successfully implemented **a pilot testing phase** involving youth workers, young participants, and project stakeholders. During this process, participants explored the platform, tested its educational structure and interactive features, and shared valuable feedback regarding usability, accessibility, navigation, learning experience, and visual presentation. By carefully listening to participants' ideas, recommendations, and experiences, the partnership was able to further improve the platform and create a more user-friendly, engaging, and accessible educational environment adapted to the needs of different target groups.

Co-funded by
the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the Youth and Lifelong Learning Foundation (INEDIVIM). Neither the European Union nor the granting authority can be held responsible for them.

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

The FEEL GREEN E-Platform will include **four comprehensive educational modules** that guide participants through different dimensions of sustainability, energy efficiency, climate awareness, behavioral change, and digital engagement. The educational content will be developed using learner-centered and non-formal education approaches designed to encourage critical thinking, participation, reflection, and practical application of sustainability concepts in everyday life.

Through the official launch of the FEEL GREEN E-Platform, the partnership continues its mission of empowering young people and youth workers with the knowledge, skills, and digital tools needed to support green transition and environmental responsibility across Europe.

We warmly invite youth workers, educators, organisations, stakeholders, and young people to explore the platform, discover the educational modules, and become part of the growing FEEL GREEN community working towards a greener and more sustainable future!
