

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

Successful Implementation of the FEEL GREEN Infodays

The FEEL GREEN partnership is pleased to announce the successful implementation of the FEEL GREEN Infodays, an important dissemination and awareness-raising activity developed within the framework of the project. The Infodays were organised with the active participation of young people, youth workers, educators, local stakeholders, and community members, aiming to promote sustainability awareness, energy efficiency, green skills, and environmental responsibility through participatory and interactive educational activities.

The FEEL GREEN Infodays were designed as open awareness and dissemination events focused on encouraging dialogue, community engagement, and active participation around environmental challenges and sustainable lifestyles. Through presentations, discussions, non-formal educational activities, practical examples, and collaborative learning experiences, participants had the opportunity to explore topics connected to climate change, energy consumption, green transition, sustainable behavior, and youth participation in environmental action.

During the events, the FEEL GREEN partnership also presented the main results and educational outputs of the project, including the Energy-Efficiency Research Database, the Green Skills Methodological Guide, the educational materials, the E-Handbook, and the FEEL GREEN E-Platform with its interactive learning modules and animated introduction videos. Participants were introduced to the digital learning opportunities offered by the platform and explored practical sustainability resources designed to support environmental education and youth engagement.

Particular emphasis was given to participatory learning and experiential educational approaches that encouraged participants to reflect on their own environmental behaviors and identify practical ways to adopt more sustainable habits in daily life. Interactive discussions, sustainability workshops, climate awareness activities, group reflection exercises, and examples of community-based environmental initiatives created a dynamic educational environment where young people and youth workers could exchange ideas, experiences, and perspectives related to sustainability and green transition.

The Infodays also highlighted the important role of youth workers in supporting sustainability education and encouraging behavioral change among young people. Through non-formal education methodologies, facilitation techniques, and community participation approaches, youth workers were encouraged to act as facilitators of environmental awareness and active citizenship within their local communities. The events promoted inclusion, collaboration, critical thinking, and active participation while strengthening dialogue around climate action and sustainable development.

The successful implementation of the FEEL GREEN Infodays marked another important milestone for the project, strengthening dissemination efforts and expanding the project's impact at local and European level. Through awareness-raising activities, educational participation, and community engagement, FEEL GREEN continues to empower young people and youth workers to become active contributors to a greener, more sustainable, and environmentally responsible future.
