

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

Successful Final Meeting of FEEL GREEN in Bratislava

28 & 29th of May the FEEL GREEN partnership successfully held the project's Final Meeting in Bratislava, Slovakia, bringing together two representatives from each partner organisation for two days of evaluation, reflection, collaboration, and strategic discussion regarding the overall implementation and impact of the project. The meeting represented the final transnational activity of FEEL GREEN and marked an important milestone in concluding the project's collaborative European journey focused on sustainability education, energy efficiency, and green youth participation.

During the two-day meeting, we had the opportunity to review the full implementation process of the project and reflect collectively on the activities, educational outcomes, dissemination efforts, and achievements developed throughout the different phases of FEEL GREEN. Particular attention was given to the evaluation of the project's main results, including the research database, methodological guides, educational materials, E-Handbook, digital platform, interactive modules, awareness activities, and dissemination campaigns implemented across the partner countries.

The meeting also focused extensively on assessing the overall quality, effectiveness, and impact of the project on young people, youth workers, organisations, and local communities. Through collaborative discussions and evaluation sessions, we exchanged feedback and experiences regarding participant engagement, educational methodologies, sustainability learning outcomes, digital accessibility, and the implementation of non-formal education approaches within the project activities. We also discussed the strengths, challenges, and lessons learned throughout the implementation process and identified important elements that contributed to the successful development of the project.

An important part of the Final Meeting was dedicated to sustainability and future exploitation discussions. Together, we explored ways in which the FEEL GREEN educational resources, platform, methodologies, and dissemination materials can continue to be used beyond the official duration of the project. **We discussed opportunities for future cooperation, continued promotion of sustainability education, and the long-term use of the project's educational tools within youth work, non-formal education activities, and community initiatives across Europe.**

The meeting additionally provided an opportunity to reflect on the broader European impact of FEEL GREEN and the importance of transnational cooperation in addressing environmental challenges and promoting green transition. Throughout the project, the partnership between organisations from Greece, Slovakia, and Luxembourg created valuable opportunities for intercultural dialogue, exchange of good practices, collaborative learning, and the development of innovative sustainability-oriented educational approaches adapted to different local realities and community needs.

The successful completion of the Final Meeting in Bratislava marked the closing phase of an important and meaningful European collaboration. Through eighteen months of cooperation, educational development, research activities, awareness campaigns, and youth participation initiatives, **we worked together towards a common goal: empowering young people and youth workers to become active contributors to a greener, more sustainable, and environmentally responsible future.** The FEEL GREEN partnership remains committed to continuing this mission beyond the project itself and ensuring the long-term sustainability and impact of its results across European communities.
