

Fostering Energy Efficiency Leaders : Empowering Youth to Start a Green Revolution

Project Number : 2024-1-EL02-KA210-YOU-000252038

FEEL GREEN Successfully Completed

After months of collaboration, research, educational development, dissemination activities, and community engagement, the FEEL GREEN project – Fostering Energy Efficiency Leaders: Empowering Youth to Start a Green Revolution – has officially reached its successful completion. Throughout the implementation of the project, the partnership worked collectively towards promoting sustainability awareness, energy efficiency, green skills development, and environmental responsibility among young people and youth workers across Europe.

Developed within the framework of the Erasmus+ Program, FEEL GREEN responded to the growing environmental and climate-related challenges affecting contemporary societies by focusing on the importance of non-formal education, active citizenship, youth participation, and sustainable behavioral change. **The project aimed to empower young people and youth workers with practical knowledge, educational methodologies, digital learning opportunities, and sustainability competences capable of supporting greener lifestyles and more environmentally responsible communities.**

Throughout the project, the partnership successfully developed a wide range of educational and research-based outputs designed to strengthen sustainability education and green youth work. These included the Energy-Efficiency Research Database, the Methodological Guide for youth workers, the FEEL GREEN E-Handbook of Good Practices, and the interactive FEEL GREEN E-Platform with its four educational modules and animated introduction videos. Together, these resources created a comprehensive educational ecosystem combining sustainability knowledge, participatory learning, digital engagement, and practical implementation approaches.

An important achievement of FEEL GREEN was the successful involvement of young people, youth workers, educators, organisations, and local stakeholders through awareness campaigns, Infodays, dissemination activities, pilot testing processes, and community engagement initiatives implemented across the partner countries. Through participatory learning experiences, sustainability discussions, workshops, and digital educational activities, the project promoted critical thinking, environmental awareness, collaboration, and active participation in climate and sustainability-related actions.

At European level, FEEL GREEN strengthened cooperation and exchange between organisations from Greece, Slovakia, and Luxembourg, creating valuable opportunities for intercultural dialogue, exchange of good practices, and collaborative educational development. The project highlighted the importance of transnational cooperation in addressing environmental challenges and demonstrated how youth work and non-formal education can contribute meaningfully to sustainability transition and climate awareness within diverse communities.

Beyond its official completion, the FEEL GREEN partnership remains committed to ensuring the long-term sustainability and future exploitation of the project's results. The educational materials, digital platform, handbook, and methodological resources will continue to remain accessible and available for youth workers, educators, organisations, and young people interested in sustainability education and green skills development. The consortium also aims to continue promoting the project's outcomes through future educational activities, dissemination efforts, and community-based sustainability initiatives.

The completion of FEEL GREEN marks not the end, but the continuation of a shared European effort towards building more sustainable, environmentally conscious, and energy-efficient communities. We would like to sincerely thank all partners, participants, youth workers, stakeholders, and supporters who contributed to the successful implementation of the project and helped transform FEEL GREEN into a meaningful and impactful European sustainability initiative.
